TOWER HEALTH

Advancing Health. Transforming Lives.

Your Health History is Now at Your Fingertips

Health Records on iPhone makes it easy to access and visualize your health records. With this feature, Reading Hospital and Tower Health Medical Group patients can now view their health records on their device by authenticating (once) using their MyChart patient portal credentials without having to log into MyChart.

Patients can also choose to be notified when new records are ready to view.

Health Records on iPhone is located in the Health app, which also shows data related to your activity, heart rate, nutrition, and other health data consolidated from iPhone, Apple Watch, and third-party apps.

View Your Health Record Data Chronologically

- Get a timeline view of your health record data
- Visualize important dimensions of your health: allergies, conditions, immunizations, lab results, medications, procedures, and vitals

Set Up With a Few Simple Steps

- Search for Reading Hospital directly in the Health app
- Enter your MyChart user name and password and follow the short setup instructions
- Your records will start to appear in the Health app

Keep Your Data Secure

- Health record data is encrypted and protected with your iPhone's passcode, Touch ID or Face ID

See Category-Specific Details

- Details relevant to each data category are available, including:
 - Reference ranges for lab results and vitals
 - Prescriber name and dosage instructions for medications
 - Reason, outcome, and complications for procedures
 - Status and severity of conditions
 - Severity of allergy reactions
 - Reason for immunizations

Stay Up To Date With Your Health

- Establishing a connection with your hospital or clinic enables you to download historical and future health records
- When new records are available from participating institutions, they show up in the Health app — you don't have to do anything
- Receive notifications so you're always informed when new records are available
