Welcome! The Medical Imaging Program at Reading Hospital School of Health Sciences is an accredited educational program that offers students exceptional classroom and clinical experiences in preparation for an exciting career in imaging. For more than 73 years, the program has educated women and men who have continued to serve in every field of radiologic imaging, both here at Reading Hospital and in locations across the nation.

A Rewarding Career
The fast-paced, ever-changing profession of radiography allows imaging professionals to utilize technical, scientific, and interpersonal skills when providing compassionate radiologic care for their patients. Through the performance of high quality radiologic exams, radiographers play an integral role in assisting their patients’ achievement of health. A great deal of personal and professional satisfaction can be realized as this information, critical for the diagnosis and treatment of disease, is acquired.

To begin an exciting career in Radiologic Technology, apply to the Medical Imaging Program at Reading Hospital School of Health and Sciences.

MEDICAL IMAGING PROGRAM
PROGRAM LEARNING GOALS

At the completion of the Medical Imaging Program, the student will:

1. Synthesize knowledge and skills essential to the successful practice of diagnostic medical imaging.
   - Exhibit a thorough understanding of radiography fundamentals;
   - Apply knowledge from physical, biological, and social sciences to provide quality healthcare to individuals, families, and communities;
   - Integrate the ethical and legal standards pertinent to a medical imaging professional.

2. Practice competently as an entry-level Radiologic Technologist.
   - Produce diagnostic quality radiographs;
   - Demonstrate appropriate patient care;
   - Employ the principles of radiation protection;
   - Collaborate effectively across interdisciplinary team lines.

3. Communicate effectively with individuals, families, and communities.
   - Instill comfort and a sense of confidence through clear, understandable communication;
   - Accurately document relevant medical information;
   - Transmit information to members of the healthcare team efficiently and appropriately;
   - Interact professionally with individuals, families, and communities.

4. Provide diagnostic imaging services ethically and compassionately.
   - Exhibit compassionate behavior during the care of all patients;
   - Demonstrate empathy during the care of all patients;
   - Adhere to the ARRT Code of Ethics;
   - Employ the ASRT Practice Standards for Medical Imaging.

5. Utilize the problem solving process effectively.
   - Assess and analyze data for effective decision making;
   - Select an appropriate course of action based on presenting circumstances;
   - Evaluate effectiveness of action taken;
   - Modify course of action as required.

6. Embrace the need for ongoing professional growth and development.
   - Value the importance of continued professional involvement;
   - Investigate a variety of professional growth opportunities;
   - Design a five-year career pathway.
Our Philosophy

Reading Hospital School Of Health Sciences

Philosophy

The Reading Hospital School of Health Sciences aims to challenge students with educational experiences that enhance understanding of their discipline, reinforces the critical nature of interdisciplinary practice in healthcare, and inculcates the value of life-long learning. We seek to build a collegial alliance of faculty, students, staff, and administration committed to providing course work, resources, activities, and instructional facilities that support excellence in teaching and learning.

We believe that a strong educational foundation helps students to integrate learning and community interests, and prepares them for success in their major fields of study and professional life. All Programs of study at the School encourage the examination of fundamental questions of human experiences and respectful dialogue in the context of diverse points of view.

The faculty is also responsible for developing academic policies and the design and content of the program curriculum. The Faculty, through its teaching, scholarship, and service, is the most visible example of the intellectual life of the School.

We seek students of diverse cultures, talents, experience, and interests who seek to excel both as persons and in the study of a healthcare related profession.

We seek students who are able to assume responsibility for their academic success, a quality that anticipates the accountability and ethical demands of professional practice.

The members of our administrative leadership and academic support services are dedicated to the success of our teaching and learning endeavor. They are charged with fostering strategic planning, institutional assessment, and effective stewardship of School resources. They support the development of organized School activities that provide opportunities for community engagement and foster development of leadership skills.

Medical Imaging Program

Philosophy

The Medical Imaging Program is committed to helping students view themselves as integral members of a healthcare team whose function is to collectively provide the highest quality patient care achievable. The academic and clinical curricula of the Medical Imaging Program are purposefully designed to educate entry-level practitioners who are well prepared to provide compassionate, ethical, and evidence-based patient care when delivering medical imaging services. Students learn to meet the total needs of the patient, with emphasis placed upon the core values of the Medical Imaging Program (compassion, integrity, precision, accountability, and respect) as well as the Franciscan tradition at Alvernia University (service, humility, peacemaking, contemplation, and collegiality).
Accreditation

The Joint Review Committee on Education in Radiologic Technology (JRCERT) accredits Reading Hospital School of Health Sciences Medical Imaging Program (JRCERT: 312-704-5300; www.jrcert.org).

Reading Hospital is accredited by the Joint Commission, and is approved and licensed by the Department of Health of the Commonwealth of Pennsylvania.

ARRT National Registry Examination

The Program at Reading Hospital School of Health Sciences has an academic curriculum designed to facilitate a student’s mastery of imaging fundamentals. The core curriculum fully covers information necessary for graduates to work in entry-level radiography positions. A graduate must successfully complete the national registry examination to become a Registered Technologist. Program graduates are eligible to take the national examination administered by the American Registry of Radiologic Technologists (ARRT).

A passing score on this challenging exam allows the examinee the privilege of registered status. “An ARRT certificate confers upon its holder the right to use the title ‘Registered Technologist’ and its abbreviation ‘RT (ARRT)’ in connection with his or her name as long as the registration of the certificate is in effect.” (reference: www.arrt.org, Designation Awarded)

Please note: Individuals who have been convicted of a felony or misdemeanor may have violated the American Registry of Radiologic Technologists Code of Ethics, and may be considered ineligible to sit for national board examinations. Individuals with questions regarding their eligibility are encouraged to submit a pre-application form to the ARRT before entering into an approved educational Program. This form may also be submitted after an individual has been enrolled. Requests for pre-application forms must be presented directly to the ARRT: 651-687-0048.

Reading Hospital School of Health Sciences requires a criminal background check and child abuse clearance prior to admitting students to its educational Programs. A Pennsylvania State Police Request for Criminal Record Check and Pennsylvania Child Abuse History Clearance must be completed and forwarded directly to the School of Health Sciences Admissions Department. The student is responsible for all fees associated with this requirement.

The Medical Imaging Program offered by Reading Hospital School of Health Sciences is a hospital-based certificate program in radiology and a dual enrollment affiliation with Alvernia University. The 27-month curriculum is broken down into two major components: professional education and general education. Both of these components must be fully satisfied in order for students to advance, graduate, and receive a certificate of completion from Reading Hospital School of Health Sciences Medical Imaging Program.

Combining classroom and clinical experiences, the 27-month certificate program prepares graduates for entry-level employment as diagnostic radiographers in a variety of radiologic healthcare settings. The curriculum evolves from the concepts of normal anatomy to abnormal pathology, and from simple to complex theory. Coursework requirements include, but are not limited to, the professional curriculum established for entry-level radiographers by the American Society of Radiologic Technologists (reference: www.asrt.org). The curriculum is also designed to foster professional and ethical values, instill a desire for lifelong learning, and promote development of critical thinking and problem-solving skills.

Clinical experience takes place within the Department of Radiology and satellite imaging centers of Reading Hospital. This expansive department provides students many opportunities to develop the skills necessary to work competently in a diagnostic radiology department upon graduation. During the 27-month educational program, multiple clinical rotations are scheduled in the following areas, and will allow students the supervised, hands-on experience necessary to continually refine their imaging skills.

General Radiology
- Abdominal
- Extremity
- Fluoroscopy
- Geriatric
- Head and Neck
- Mobile (Portable) Radiography
- Operating Room Radiography
- Outpatient Imaging Facilities
- Pediatric
- Pelvic
- Spinal
- Thoracic
- Trauma Radiography
- Urography
- The program admits a new class every January; class size is limited to 20 students per year.

- Classes and clinical experiences are scheduled to run Monday through Friday. While educational experiences may be scheduled between the hours of 7 a.m. and 9 p.m., the vast majority of educational experiences are scheduled between the hours of 7 a.m. and 4 p.m.

Due to the limitations presented by competency requirements and procedure scheduling, the Program does not offer part-time or evening educational sessions. Advanced placement is not offered to any student due to the absence of standardized curriculum sequencing in radiography programs.

**ARRT Certification Eligibility**

- Eligibility requirements for the national certification examination administered by the American Registry of Radiologic Technologists (ARRT) are twofold:

  1. Candidates pursuing primary pathway certification in Radiography must have, within the past three years, successfully completed an educational program that is accredited by a mechanism acceptable to the ARRT.
     - Reading Hospital School of Health Sciences Medical Imaging Program meets this requirement.

  2. All candidates for primary pathway certification must have earned an academic degree before becoming certified.
     - Completion of Alvernia University’s Medical Imaging Associate Degree program in Medical Imaging meets this requirement.

Reference: [https://www.arrt.org/certification](https://www.arrt.org/certification)

**Dual Enrollment Affiliation with Alvernia University**

- For the purpose of assisting students to satisfy the academic degree requirement, Reading Hospital School of Health Sciences has entered into an affiliation agreement with Alvernia University. Through a dual-affiliation agreement, students who enroll in the hospital-based Medical Imaging Program offered at Reading Hospital School of Health Sciences will simultaneously enroll in Alvernia University’s Associate of Science in Medical Imaging degree program. Dually enrolled students who successfully complete all aspects of Reading Hospital School of Health Sciences Medical Imaging curriculum are eligible to graduate with two awards, each conferred by their respective institution:

  - A certificate of completion in Medical Imaging from Reading Hospital School of Health Sciences and

  - An Associate of Science in Medical Imaging from Alvernia University.

Dually enrolled students must remain aware of the need to meet all requirements of both programs: Reading Hospital School of Health Sciences Medical Imaging Program and that offered by Alvernia University, as they are two separate entities. The expectations of both institutions must be fully satisfied in order for dually enrolled students to achieve eligibility to take the national credentialing examination.

**Complete Credit Breakdown**

49 Medical Imaging credits
29 Liberal Arts Core credits
Total: 78 credits

**Credit Hours**

Credit assigned to medical imaging courses does not constitute “college credit” and does not imply medical imaging courses earn the equivalent of college credit. The term “credit” assigned to medical imaging courses is for grading and/or financial aid purposes only. Only an authorized degree-granting institution in which a student enrolls may determine whether the completed medical imaging course may be accepted for “college credit.” It does not refer to academic credits or to the awarding of college credit and degrees.

The Medical Imaging Program defines a credit hour as: a unit of measure that places a value to the level of instruction and time requirements for a medical imaging or general education course. The Medical Imaging Program is responsible for determining the credit hours awarded for all courses offered in the medical imaging program of study.

- Medical Imaging Courses: The credit to contact hour of 1:1 in classroom instruction (lecture) and 1:5 in clinical experience/laboratory (clinical) is utilized to determine credit hours for medical imaging courses. A ratio of 1:15 for classroom theory hours (15 hours of lecture = 1 credit hour) and 1:75 for skills/clinical laboratory experience (75 hours of clinical = 1 credit hour).

- General Education Courses: The credit to contact hour of 1:1 in classroom instruction (lecture) and 1:2 in laboratory is utilized to determine credit hours for general education courses delivered by Alvernia University. A ratio of 1:15 for classroom instruction (15 hours of classroom instruction = 1 credit hour) and 1:30 for laboratory experience (30 hours of laboratory experience = 1 credit hour).

All applications for admission into the Medical Imaging Dual Enrollment Program should be submitted to Reading Hospital School of Health Sciences.
ADMISSION INFORMATION

PROCEDURE
Admission is competitive with specific academic standards. Selection of students will be based on personal composition, academic ability, references, interview performance, aptitude tests, writing samples, and previous healthcare experience according to Program-specific requirements. The School reserves the right to deny admission or readmission or to revoke admission to any applicant if, in the opinion of the School, his/her admission is not in the best interest of the student or the School.

A. General Admissions Procedures

1. Overview of Criteria
   - Applicants must be citizens of the United States or provide documentation of permanent residency or working status.
   - All applicants must have a high school diploma or state-authorized examination (e.g., General Educational Development Certificate (GED), High School Equivalency Test (HiSET), and the Test Assessing Secondary Completion (TASC).) Home-schooled students must have a diploma from an accredited home school association, or have met requirements for the GED or other state-authorized examination. The School does not admit applicants based upon the ability-to-benefit testing process.
   - Applicants may be required to take post-secondary coursework to meet the academic requirements of the individual programs.
   - Cumulative grade point average (GPA) of 2.8 or greater in high school or post-secondary coursework is required for all applicants and candidates for matriculation. The most recent post-secondary GPA will be used in the admission decision.
   - Potential students must submit two reference forms from teachers, guidance counselors, employers, supervisors, or others. Healthcare professionals must submit one reference from the current or most recent healthcare employer.

2. Technical Standards for All Applicants
   Successful completion of a School of Health Sciences Program necessitates mental and physical health essential to meet the objectives of the curriculum, as well as other skills necessary for success in the classroom and clinical components of the Program. Based on these criteria, applicants must:
   - Be able to read, write, and speak the English language, and communicate in an understandable manner.
   - Possess the emotional health necessary to fulfill the educational requirements of the Program.
   - Demonstrate a history of personal integrity, compassion, motivation, and the ability to function in stressful situations.
   - Be able to walk, stand, move, and sit for long periods of time.
   - Possess auditory, visual, and tactile abilities sufficient to assess and monitor health needs and provide safe care.
   - Possess interpersonal abilities sufficient to interact with individuals with various backgrounds.

In Programs requiring physical skill and dexterity:
   - Be able to lift and move patients and equipment.
   - Have fine motor movement to complete tasks in a safe and effective manner.

The School makes every effort to accommodate students and applicants with disabilities. Any applicant with a documented disability can request special accommodations by notifying the Admissions Office in writing at the time of application.
3. Pre-Admission Information

All materials that are submitted to the Admissions Office become the property of the School of Health Sciences and cannot be returned or forwarded unless the applicant makes a formal request in writing to the School.

Any misrepresentation or omission of facts or essential documents during the application process and/or after acceptance into the Program will result in a delay, denial, or revocation of admission.

As deemed appropriate, the Admissions Committee reserves the right to waive admission requirements after reviewing an applicant’s completed record.

All applications must be completed by the deadline described under the Program-specific requirements. A completed application file must contain:

- A completed application and an application fee.
- Proof of permanent residency or working status, if applicable.
- An official high school transcript or GED.
- All official post-secondary transcripts, if applicable.
- A copy of Practical Nursing license, if applicable.
- Essay, if applicable.
- Aptitude test scores, as required.
- Two references.

B. Additional Requirements for Foreign-Educated Students

The School is not approved to issue or accept student visas. Applicants must show proof of permanent residency or working status.

Test of English as a Foreign Language (TOEFL), administered by the Educational Testing Service (ETS), Princeton, New Jersey, may be required for applicants educated outside the United States or whose preferred language is not English, including those transferring from English-speaking colleges and universities.

The School may require the following documentation to determine eligibility for admission.

- Satisfactory score on TOEFL. Testing must have occurred within two years of the application submission.
- An evaluation of foreign transcripts by the World Education Service (WES) or other approved agency is required.
- Certificate of Preliminary Education (CPE) from the Department of Education.
- General Education Development (GED).
- General Report from the Commission on Graduate Foreign Nursing Schools (CGFNS).
- Evidence of completion of required high school or post-secondary coursework.
- Paper-based score of 560 or internet-based score of 83.

In addition to the general admissions procedures, all applicants must fulfill Program specific requirements described below.

The Medical Imaging Program admits new classes every January. The completed application deadline for spring admission is April 15 or when qualified student capacity has been reached.

Admission into the Program is highly competitive. For this reason, the Admissions Committee operates in accordance with a selective admission process, which means the best-qualified applicants each year receive consideration for admission.

- The Admissions Committee strongly suggests that applicants complete their file well in advance of the April 15 application deadline.
- Formal admission interviews are also required.
  - Admission interviews for academically qualified candidates end when the admission class has reached maximum capacity.
- A numerical evaluation system is used during the admissions process to objectively determine the suitability of each candidate. Final selection is the responsibility of the Program’s Admissions Committee.
- Typically, candidates will be notified of acceptance by August 15 for spring enrollment. Final acceptance into the Medical Imaging program requires that all post-acceptance requirements be completed according to the established deadlines. Failure to comply will result in forfeiture of enrollment; admission seat will be awarded to the next qualified candidate interested in enrollment.
- The Medical Imaging Program does not offer deferment of admission. Applicants who experience a change in personal circumstances which warrants a delay in admission are encouraged to reapply.

Minimum Admission Requirements:

To be considered for admission, all applicants must have a minimum GPA of 2.8 or higher and must include the following:

- A high school diploma or state-authorized examination (e.g., General Educational Development Certificate (GED), High School Equivalency Test (HiSET), and the Test Assessing Secondary Completion (TASC). Home-schooled students must have a diploma from an accredited home school association, or have met requirements for the GED or other state-authorized examination.
An earned grade of "C" or better in the subjects and units listed below:
- English: 4 units
- Social Studies: 3 units
- Mathematics: 3 units, including Algebra I
- Science: 3 units, including Physics or Chemistry/Lab (Physics is preferred)

- Documentation of a high school or collegiate cumulative GPA of 2.8 or higher. The most recent GPA will be used in the admission decision.
- Successful completion of an interview, which is granted by the Program to the best qualified candidates.
- SAT: 500 in each section; ACT composite of 19; essay score of 7 or higher.
- Exceptions to the SAT/ACT requirement will be considered on an individual basis.
- TOEFL* paper-based score of 560 or internet-based score of 83 (*if applicable).
- Two recommendations using the official School of Health Sciences reference form.
- Please note: Applicants will need to use the official School of Health Sciences reference forms. The reference forms for the MI Program should be completed by a current or past employer, supervisor, teacher/faculty, counselor, and/or clergy.

Applicants may be required to validate minimum admission requirements through college-level coursework.

Decisions regarding acceptable reference form materials, college coursework, challenge examination results, and aptitude test scores will be at the discretion of the admissions committee.

In addition to the minimum requirements for Medical Imaging admissions, candidates who demonstrate "above average" educational potential will be considered for preferred admission based on the following criteria:
- Documentation of a high school or collegiate cumulative GPA of 3.0 or higher. The most recent GPA will be used in the admission decision.
- An earned "B" or better in college level coursework in Mathematics, Biology, English, or Communications.
- Recommendations: "recommend with confidence" rating.
- Exemplary demonstration of communication and interpersonal skills during the formal admission interview. The Admission Committee offers formal interviews to the strongest candidates in the active applicant pool.

Final selection is the responsibility of the Medical Imaging Program Admissions Committee.

**FINAL ACCEPTANCE INTO A PROGRAM OF STUDY**
Final acceptance is contingent upon submitting these post-acceptance documents and fees in accordance with established deadlines:
- A non-refundable enrollment fee to reserve your seat in the admission class. The following enrollment fees apply:
  - $300 confirmation fee due within two weeks of the date of acceptance letter.
- Receipt of all official transcripts reflecting required GPA for program admission.
- Maintaining the applicant's high school or post-secondary GPA at or above 2.8 for the remainder of the current educational experience. A minimum GPA of 2.8 is required for Medical Imaging.
- Completed and approved Criminal Record Check and FBI Fingerprint.
- Completed and approved Pennsylvania Child Abuse History Clearance.
- Valid two-year BLS for Healthcare Provider CPR certification.
- Documentation of health insurance, including hospitalization benefits.
- Healthcare provider confirmation of required health screenings, tests, and immunizations.
- Copy of photo identification, as requested (i.e., valid driver's license, school or employer identification, permanent residency card).
- Necessary paperwork used to verify official name or name changes.
- Other program-specific information as requested by admissions.

**DEFERMENT**
The Medical Imaging Program does not offer deferment of admission. Applicants who experience a change in personal circumstances which warrants a delay in admission date are encouraged to reapply.

**WAIT LIST**
Qualified applicants may be wait-listed when the Program’s clinical and facility capacities have reached maximum levels. Wait-listed applicants will be notified if space becomes available. When offered admission, these applicants must meet the post-acceptance requirements outlined above.

**CANCELLATION**
Applicants whose files are cancelled by either their own efforts or the efforts of the Admissions Committee can reaply to a program at a later date.

### NOTES:

- The Medical Imaging Program Applicant Point System evaluates applicants based on various criteria, including Service Excellence Essay and Interviewer Interview.
- Scores are calculated using specific weightings and evaluation scales.
- The overall score is determined by combining the weighted scores from different sections.
- The program aims to identify candidates who are well-suited for the Medical Imaging profession, considering their skills, behaviors, and overall impression.
## CURRICULUM PLAN

In order to maintain enrollment in the program, students must pass each course with a 75 percent or higher and maintain an overall Medical Imaging Course average of 80 percent or higher.

*Dually Enrolled Students: THE 210 satisfies the Medical Ethics requirement for Reading Hospital School of Health Sciences certificate of completion as well as a portion of the Philosophy/Theology requirement for the Alvernia University Associate of Science degree. Students may elect to take a Medical Ethics course and otherwise satisfy the AU Philosophy/Theology requirement.
MEDICAL IMAGING PROGRAM

COURSE DESCRIPTIONS

BIO 107 Human Anatomy and Physiology (3.0 credits)
Homeostatic mechanisms of the human body with emphasis on structure and function are studied. Gross and microscopic structures are correlated with function of cells, tissues, organs, and systems of the body. Major topics include: skeletal, muscular, and nervous systems. Three hours of lecture per week.
Co-requisite: BIO 117

BIO 108 Human Anatomy and Physiology II (3.0 credits)
Emphasis is on structure and function of endocrine, cardiovascular, respiratory, lymphatic, digestive, urinary, and reproductive systems. Gross and microscopic structures are correlated with functions of cells, tissues, organs, and systems of the body. Three hours of lecture per week.
Co-requisite: BIO 118

BIO 117 Human Anatomy and Physiology I Lab (1.0 credit)
Experimental approach to the study of human anatomy and physiology is used to reinforce lecture concepts. The exercises present the core elements of the subject matter in a hands-on manner. The labs are presented in the same time period the material is being discussed in lecture. One two-hour lab per week.
Co-requisite: BIO 107

BIO 118 Human Anatomy and Physiology II Lab (1.0 credit)
Experimental approach to the study of human anatomy and physiology is used to reinforce lecture concepts. The exercises present the core elements of the subject matter in a hands-on manner. Labs are presented in the same time period the material is being discussed in lecture. One two-hour lab per week.
Co-requisite: BIO 108

COM 101 Composition and Research (3.0 credits)
Core writing requirement, reviews fundamental principles of rhetoric, grammar, punctuation, and spelling. Requirements include a research paper using MLA documentation guidelines and several expository papers. Course is available only after placement by departmental faculty. Students must achieve “C” or better to fulfill core requirements.

LAE 1/COM 213 (3.0 credits)
The Liberal Arts Elective 1 requirement can be satisfied by successful completion of COM 213 or a similar COM course. Historically, COM 213 has been offered in the curricula on RHSHS campus, but the school reserves the right to provide a COM substitution. Students must receive approval from both RHSHS and Alvernia University for transfer credit.

COM 213 Interpersonal Communication (3.0 credits)
An introductory survey of basic theories, models and practices of interpersonal communication. Students learn interpersonal communication principles, sharpen awareness of own and others’ personal communication habits and ultimately improve interpersonal communication skills.

MAT 102 Algebra II (3.0 credits)
This course is designed to prepare science or mathematics major for pre-calculus. Topics include algebra of polynomials, roots, radicals and exponents, relations and functions and their graphs, systems of equations and logarithms. Prerequisite: MAT 100 or satisfactory score on Mathematics Placement Test.

LAE2/MUS 123 (3.0 credits)
The Liberal Arts Elective 2 requirement can be satisfied by successful completion of MUS 123 or a similar creative expressions course. Historically, MUS 123 has been offered in the curricula on RHSHS campus, but the school reserves the right to provide a course substitution. Students must receive approval from both RHSHS and Alvernia University for transfer credit.

MUS 123 American Popular Music (3.0 credits)
Prepares subjects of music with special emphasis on growth and development of American popular music, rock, and jazz. Listening lessons, independent projects, and class discussions that encourage active participation and develop an appreciation for our rich heritage of music and the arts.

PHI 105 Introduction to Philosophy (3.0 credits)
Historical introduction to fundamental problems and methods of philosophy based on readings in ancient, medieval, and modern literature.

SOC 306 Racial and Cultural Relations (3.0 credits)
Analysis of ethnic and racial differentiation in pluralistic societies. Theories of dominant and minority groups are studied. This course fulfills the human diversity graduation requirement.

THE 210 Medical Moral Theology (3.0 credits)
Investigation of moral problems which can arise in the area of bioethics. Introductory survey of the basic Christian principles of morality is followed by treatment of various medical moral situations. A natural law methodology is applied throughout the course. Fulfills the Ethics/Morality requirement.

**DUALLY ENROLLED STUDENTS:** THE 210 satisfies a Medical Ethics requirement for the Medical Imaging certificate of completion and also satisfies the Philosophy/Theology requirement for the Alvernia University Associate of Science degree. Students may elect (prior to enrollment in the program) to take an equivalent Medical Ethics course in place of THE 210 which will satisfy both the program requirement and the Alvernia University Philosophy/Theology requirement. It is highly suggested that the student meet with the RHSHS admissions staff to verify course transferability prior to enrolling in a substitute course.
MEDICAL IMAGING PROGRAM

COURSE DESCRIPTIONS

MI 110 Introduction to Medical Imaging
This course provides a broad, general introduction to the foundations in radiography and the radiography practitioner’s role in the health care delivery system. Principles, practices, and policies of the healthcare organization(s) will be examined, in addition to the professional responsibilities of the radiographer. Common administrative structures found within a radiology department will be discussed and professional organizations significant to radiology will be explored. Students will also be oriented to the mission of Alvernia University, Reading Hospital School of Health Sciences, and the Medical Imaging Program.

Prerequisites: Not Applicable

Theory Hours: 15 Hours (1.0 credit)

Clinical Hours: Not Applicable

MI 115 Patient Care & Pharmacology for Medical Imaging Professionals
This course addresses the basic concepts of patient care and underscores the physical and emotional needs of the patient and family. Routine and emergency patient care procedures will be described, as well as infection control procedures utilizing standard precautions. The role of the radiographer in patient education will be identified.

Prerequisites: BIO 107: Anatomy & Physiology I; BIO 117: Anatomy & Physiology Laboratory I; COM 101: English Composition and Research; MAT 102: Intermediate Algebra; MI 110: Introduction to Medical Imaging

Theory Hours: 45 Hours (3.0 credits)

Clinical Hours: Not Applicable

MI 120 Radiation Protection & Medical Terminology
This introductory course provides theory and application to the elements of medical terminology. A word-building system will be introduced and abbreviations and symbols will be discussed. Also introduced will be an orientation to the understanding of radiographic orders and interpretation of diagnostic reports. Related terminology is addressed. This course will introduce an overview of the principles of radiation protection, including the responsibilities of the radiographer for patients, personnel, and the public. Devices used for protection will be presented. Radiation health and safety requirements of federal and state regulatory agencies, accreditation agencies, and healthcare organizations are incorporated.

Prerequisites: BIO 107: Anatomy & Physiology I; BIO 117: Anatomy & Physiology Laboratory I; COM 101: Composition and Research; MAT 102: Intermediate Algebra; MI 110: Introduction to Medical Imaging

Theory Hours: 30 Hours (2.0 credits)

Clinical Hours: Not applicable

MI 130 Imaging Principles and Equipment
This course establishes the relationship between radiation production and characteristics, radiographic equipment, and factors that govern the image production process. The basic knowledge of atomic structure and terminology, nature and characteristics of radiation, x-ray production, the fundamentals of photon interactions with matter, and the design and function of the radiographic equipment are explored. The concepts of radiographic density, contrast, latitude, detail, and distortion are analyzed with respect to how they affect the image production process. Ideal technique formulation and selection, troubleshooting, and error correction is examined. (Mathematics involved)

Prerequisites: MI 115: Patient Care & Pharmacology; MI 120: Radiation Protection & Medical Terminology; MI 015: Clinical Orientation; MAT 102: Intermediate Algebra

Theory Hours: 45 Hours (3.0 credits)

Clinical Hours: Not Applicable

MI 235 Medical Image Acquisition & PACS
This course is designed to impart an understanding of the components, principles, and operation of imaging systems found in diagnostic radiology. Factors that impact image, image acquisition, display, archiving, and retrieval are discussed. Guidelines for selecting exposure factors and evaluating images within an imaging system assist students to bridge between film-based and digital imaging systems. Principles of quality assurance and maintenance are presented.

Prerequisites: MI 130 Imaging Principles and Equipment; MI 025: Clinical Seminar II

Theory Hours: 60 Hours (4.0 credits)

Clinical Hours: Not applicable

MI 240 Radiation Biology
This course is designed to provide an overview of the principles of the interaction of radiation with living systems. Radiation effects on molecules, cells, tissues, and the body as a whole are presented. Factors affecting biological response are presented, including acute and chronic effects of radiation.

Prerequisites: MI 235: Medical Image Acquisition & PACS; MI 035: Clinical Seminar III

Theory Hours: 30 Hours (2.0 credits)

Clinical Hours: Not applicable

MI 260 Introduction to Computed Tomography and Cross Sectional Anatomy
This course is provided to further continue the study of the gross anatomy of the entire body through cross sectional imaging. Detailed study of gross anatomical structures will be conducted systematically for location, relationship to other structures, and function. Content will also provide entry-level radiography students with principles related to computed tomography (CT) imaging. Basic principles of linear tomography will be studied in relation to the patient care setting.

Prerequisites: MI 240: Radiation Biology; MI 045: Clinical Seminar IV

Theory Hours: 60 Hours (4.0 credits)

Clinical Hours: Not applicable
MI 275 Achieving and Advancing Professional Standing
This course provides students with necessary information as they prepare to take the national credentialing examination administered by the American Registry of Radiologic Technologists (ARRT). The application process utilized by the ARRT is explained and continuing education requirements for ongoing registry maintenance are discussed. Students prepare for the credentialing examination through participation in standardized exams, investigate a variety of professional growth opportunities, and design a career pathway.
Prerequisites: MI 055: Clinical Seminar V; MI 260: Introduction to Computed Tomography and Cross Sectional Anatomy.
Theory Hours: 23 Hours  (1.0 credit)
Clinical Hours: Not applicable

MI 015 Clinical Seminar I; Clinical Orientation
Clinical Seminar I is designed to support the foundation necessary to perform standard radiographic procedures. The fundamental skills necessary to adapt studies to specific patient needs will be introduced as well as concepts related to pathology with emphasis on radiographic appearance. Laboratory and clinical experience will be used in conjunction with seminars to facilitate mastery of skills necessary for the beginning medical imaging student.
Theory Hours: 8 Hours  (0.5 credit)
Clinical Hours: 38 Hours  (0.5 credit)

MI 025 Clinical Seminar II; Chest, Abdomen, Distal Extremities
Clinical Seminar II is designed to support the foundation necessary to perform standard radiographic procedures. Chest radiography, abdominal radiography, and distal portions of the appendicular skeleton will be included. The skills necessary to adapt these studies to specific patient needs will also be introduced. Demonstration of optimal diagnostic examinations and radiographic image evaluation will be included; pathological effects and recommendation for improvement of image quality will be discussed. Laboratory and clinical experience will be used in conjunction with seminars to facilitate mastery of skills necessary for the beginning medical imaging student.
Prerequisites: BIO 108: Anatomy & Physiology II; BIO 118: Anatomy & Physiology Laboratory I; MI 015: Clinical Seminar I; Clinical Orientation; MI 115: Patient Care & Pharmacology for Medical Imaging Professionals; MI 120: Medical Terminology & Radiation Protection.
Theory Hours: 30 Hours  (2.0 credits)
Clinical Hours: 225 Hours  (3.0 credits)

MI 035 Clinical Seminar III; Proximal Extremities, Shoulder Girdle, Mobile & Surgical
Clinical Seminar III is designed to support the foundation necessary to perform standard radiographic procedures. Proximal Extremity, Shoulder Girdle, Mobile/Surgical Radiography, and Trauma Radiography. The skills necessary to adapt these studies to specific patient needs will also be introduced. Demonstration of optimal diagnostic examinations and radiographic image evaluation will be included; pathological effects and recommendation for improvement of image quality will be discussed. Laboratory and clinical experience will be used in conjunction with seminars to facilitate mastery of skills necessary for the beginning medical imaging student.
Prerequisites: THE 210: Medical Moral Theology; MI 130: Imaging Principles & Equipment; MI 025: Clinical Seminar II; Chest & Distal Extremities
Theory Hours: 30 Hours  (2.0 credits)
Clinical Hours: 225 Hours  (3.0 credits)

MI 045 Clinical Seminar IV; Bony Thorax, Pelvic Girdle and Vertebral Column
Clinical Seminar IV is designed to support the foundation necessary to perform standard radiographic procedures. Instruction of radiography of the bony thorax, pelvic girdle, and vertebral column will be included. The skills necessary to adapt these studies to specific patient needs will also be introduced. Demonstration of optimal diagnostic examinations and radiographic image evaluation will be included; pathological effects and recommendation for improvement of image quality will be discussed. Laboratory and clinical experience will be used in conjunction with seminars to facilitate mastery of skills necessary for entry level medical imaging professionals.
Prerequisites: MI 235: Medical Image Acquisition and PACS; MI 035: Clinical Seminar III; Proximal Extremities, Shoulder Girdle, Mobile & Surgical
Theory Hours: 30 Hours  (2.0 credits)
Clinical Hours: 225 Hours  (3.0 credits)

MI 055 Clinical Seminar V; Fluoroscopy and Cranium
Clinical Seminar V is designed to support the foundation necessary to perform standard radiographic procedures. Instruction of advanced abdominal radiography, fluoroscopy studies, and imaging procedures associated with the cranium will be included. The skills necessary to adapt these studies to specific patient needs will also be introduced. Demonstration of optimal diagnostic examinations and radiographic image evaluation will be included; pathological effects and recommendation for improvement of image quality will be discussed. Laboratory and clinical experience will be used in conjunction with seminars to facilitate mastery of skills necessary for entry level medical imaging professionals.
Prerequisites: SOC 306: Racial & Cultural Relations; MI 240: Radiation Biology; MI 045: Clinical Seminar IV; Bony Thorax, Pelvic Girdle and Vertebral Column
Theory Hours: 45 Hours  (3.0 credits)
Clinical Hours: 375 Hours  (5.0 credits)
MI 065: Clinical Seminar VI; Special Studies
Clinical Seminar VI is designed to support the foundation necessary to perform specialty radiographic procedures. Instruction of specialized radiographic projections and protocols will be included. The skills necessary to adapt these studies to specific patient needs will also be introduced. Demonstration of optimal diagnostic examinations and radiographic image evaluation will be included; pathological effects and recommendation for improvement of image quality will be discussed. Laboratory and clinical experience will be used in conjunction with seminars to facilitate mastery of skills necessary for entry level medical imaging professionals.

Prerequisites: MI 260: Intro to Computed Tomography and Cross Sectional Imaging; MI 055: Clinical Seminar V: Fluoroscopy and Cranium Theory Hours: not applicable
Clinical Hours: 375 Hours (5.0 credits)
Applying for Financial Aid

STEP 1
Complete the Free Application for Federal Student Aid (FAFSA). The FAFSA is available online. We strongly advise you to apply no later than May 1 so that you do not miss any deadlines. You will need to reapply each year you are enrolled as a student. The FAFSA form can be completed online at www.fafsa.ed.gov.

STEP 2
The Financial Aid Office will request any additional forms that need to be completed.

STEP 3
Students who desire to borrow money under the Federal Direct Loan Program will need to complete the Direct Loan Master Promissory Note online at www.studentloans.gov. While eligibility for a student loan may be indicated on an award letter, securing those funds still requires the submission of a separate Master Promissory Note. The recommended filing date is prior to May 1 of the year you plan to enroll in the Program. Additionally, loan entrance counseling is required at www.studentloans.gov.

STEP 4
Carefully review any communication you receive from the Financial Aid Office, the Federal Student Aid Programs, and your state agency. All requests for information should be forwarded to the appropriate department or agency, or call the Financial Aid Office for assistance.

SOURCES OF FINANCIAL AID MAY INCLUDE:
- Federal Pell Grant
- PHEAA State Grant
- Employer Tuition Assistance
- Federal Direct Subsidized Loan
- Federal Direct Unsubsidized Loan
- Federal Direct PLUS Loan
- Veterans Funding

RETURN OF TITLE IV FUNDS
If a student receiving financial aid from Federal Title IV funds withdraws or is terminated from the program, any refund due must be made to the programs providing the aid according to applicable governmental regulations before any refund can be made to the student. The refund policy is in accordance with the requirements of 34 CFR 668.22, code of Federal Regulations, which determine the amount of federal aid that has been earned and how much aid must be returned to any Title IV program.

The order of repayment of Title IV funds is:
(1) Federal Direct Unsubsidized Loan
(2) Federal Direct Subsidized Loan
(3) Federal Direct PLUS Loan
(4) Federal Pell Grant
(5) Other Title IV programs

If you have questions about Title IV program funds, you may contact the Financial Aid Office.

THE ACADEMIC ENVIRONMENT

Reading Hospital
Reading Hospital is a not-for-profit healthcare center providing comprehensive acute, post-acute rehabilitation, behavioral, and occupational health services to the people of Berks and adjoining counties. Established as The Reading Dispensary in 1867, the Hospital has since expanded into a leader in tertiary care for this region of Pennsylvania.

The 671-bed West Reading facility in scenic Berks County, Pennsylvania, consists of a 22 building complex located on a 36-acre suburban campus. The Hospital also maintains clinical and support facilities at 19 locations conveniently located throughout the county.

Department of Radiology
Caring, Professional, Competent
Our staff of 21 board-certified radiologists are supported by four radiation physicists and 130 radiological technologists. The Department of Radiology consists of the following sections:
- Interventional Radiology
- Nuclear Medicine
- Radiation Oncology
- Diagnostic Imaging, which includes CT, MRI and Ultrasound

We offer 14 imaging centers throughout Berks County.

Reading Hospital School of Health Sciences
There has never been a better time to prepare for a future as a healthcare professional. Reading Hospital School of Health Sciences prepares qualified students for exciting careers through five accredited Programs:
- Clinical Pastoral Education
- Diagnostic Medical Sonography
- EMS, Paramedic Education
- Medical Imaging
- Medical Laboratory Science
- Nursing
- Surgical Technology
The state-of-the-art campus is more than an investment in our students. It represents a commitment to our community as we provide a cohesive and comprehensive education for the men and women who will become the future providers of patient care through Reading Hospital and our affiliated practices.

Staff and Faculty
The School of Health Sciences Medical Imaging Program is composed of experienced practitioners dedicated to both teaching and imaging professions. Courses are academically stimulating and challenging, as faculty constantly introduce students to the numerous changes in imaging and healthcare.

The faculty and staff are committed to helping students assess their abilities, meet their educational goals, and plan for their professional futures. The supportive relationship between faculty and students encourages students to grow professionally and personally.

Clinical Experience
The Department of Radiology at Reading Hospital maintains state-of-the-art technology in all imaging modalities. Access to digital imaging, computed radiography, and picture archival and communication systems provide students with a cutting-edge clinical experience. Throughout their 27-month education, students are exposed to virtually every diagnostic procedure with which they will come in contact as Radiologic Technologists. The high volume of patients examined provides students with the opportunity to observe and assist with a wide variety of radiographic procedures as they work to achieve competency.

Simulation Laboratories
Two radiology skills laboratories in the School – non-energized and energized – simulate typical radiographic rooms in a hospital setting. The suite combines the advantages of lifelike positioning phantoms and live imaging equipment which allow students to hone their imaging skills on technology similar to that found in healthcare settings.

An observation area between the two laboratories allows faculty and fellow classmates to watch while positioning is completed. Also, two computers networked into the main Hospital campus display images of actual patient studies, providing an excellent opportunity for improvement of future performance. Approximating a live radiographic setting, this suite promotes the teamwork necessary to function well in an actual radiology setting.

Although no images are produced, the non-energized laboratory enables students to practice positioning skills, demonstrate proficiency to their faculty, and manipulate equipment without the time constraints of a patient schedule. The energized laboratory helps medical imaging students further their positioning skills by providing an actual image using a computed radiography system. Students use this equipment to practice imaging principles and quality control methods learned in the classroom setting.

Clinical Facilities
Serving as a regional center for the care of patients in numerous subspecialties, Reading Hospital offers students outstanding facilities for clinical experience in the field of diagnostic radiology. Throughout the Program, qualified clinical staff and faculty supervise students during their many varied clinical experiences.

The Program currently schedules students at the following clinical sites for educational experiences. Students are responsible for securing transportation to and from all educational experiences.

- **Department of Radiology at Reading Hospital**
  Spruce Street & Sixth Avenue
  Reading, PA 19611

- **Reading Hospital Imaging Center at Douglassville**
  957 Ben Franklin Highway
  Route 422
  Douglassville, PA 19518

- **Reading Hospital Lab & Imaging Services at Leesport**
  5479 Pottsville Pike
  Leesport, PA 19533

- **Reading Hospital Imaging Center at Exeter**
  2 Hearthstone Court
  Reading, PA 19606

- **Reading Hospital & Imaging Services at Gateway**
  1020 Grings Hill Road
  Reading, PA 19608

- **Reading Hospital at Spring Ridge**
  2603 Keiser Boulevard
  Wyomissing, PA 19610

- **Reading Hospital Imaging Center at Berkshire Heights**
  950 B. North Wyomissing Boulevard
  Wyomissing, PA 19610
Continued Professional Development

The emergence of multiple satellite imaging areas has provided radiographers with many opportunities for continued career development. Mammography, computed tomography, magnetic resonance imaging, nuclear medicine, radiation oncology, ultrasound, cardiovascular imaging, and interventional radiography are examples of imaging areas available to graduates interested in pursuing professional career development outside general radiography. Students enrolled in the Medical Imaging Program will be provided opportunities to observe in these areas. Should a student wish to develop the skills required to work in any of these sections, additional education or job-site training following graduation from the Medical Imaging Program is required.

Lambda Nu National Honor Society

The Medical Imaging Program at Reading Hospital School of Health Sciences established the Pennsylvania Sigma Chapter of the Lambda Nu National Honor Society for Radiologic and Imaging Sciences. Exceptional students, faculty, and alumni of the Medical Imaging Program are recognized for their honor, integrity, and academic achievement when they qualify to Lambda Nu.

Student Resources

Students have access to all available resources of the School of Health Sciences Medical Imaging Program. Resources include the Hospital’s Library Services, Computer Lab, Energized and Non-Energized Radiographic Skills Lab, and Student Health. Additionally, enrolled students also benefit from access to student services offered by Alvernia University.

Library Services at Reading Hospital houses a section dedicated to radiographic imaging. Reference materials, professional books, and imaging journals are available. The privilege of borrowing these materials is extended exclusively to Medical Imaging students. Medical Imaging students also have access to nursing, medicine, and other allied health reference materials. Computers programmed for research, word processing, internet access, and email are available in the Library as well.
Policies and Procedures
School of Health Sciences Policies, as well as the Medical Imaging Program Handbook are available on our website at: reading.towerhealth.org/sohs/policies. Students are required to comply with all policies and procedures established by the School of Health Sciences, Medical Imaging Program, the Department of Radiology, Reading Hospital.

Graduate Employment
Opportunities are available in the field of Medical Imaging. Graduates have sought and gained employment in hospitals, doctors offices, free-standing imaging facilities, mobile imaging, research, education, and management. Graduates are provided assistance in obtaining employment.

For more information on Gainful Employment Disclosure, please visit our website at reading.towerhealth.org/sohs.

The faculty of Reading Hospital School of Health Sciences Medical Imaging Program reserves the right to change the curriculum, education policies, program requirements, fees, and calendar as considered necessary for the progressive development of the Medical Imaging Program.

PROGRAM EFFECTIVENESS DATA (PED)

The Medical Imaging Program gathers program effectiveness data (PED) as defined by its national accredits: the Joint Review Committee on Education in Radiologic Technology (JRCERT) (20 N. Wacker Drive, Suite 2850, Chicago, IL 60606-3182, 312-704-5300 www.jrcert.org).

Program effectiveness data (PED) includes:
- Annual program completion rate;
- Five-year average credentialing examination pass rate;
- Five-year average job placement rate;

Program effectiveness data (PED) is published on the programs website: reading.towerhealth.org/sohs.

Public access to program effectiveness data (PED) for all JRCERT accredited programs is also available via the JRCERT website: http://www.jrcert.org/resources/program-effectiveness-data or specifically for Reading Hospital School of Health Sciences Medical Imaging Program via our website: http://www.readinghealth.org/app/files/public/145/ped-mi-mission-mi-goals.pdf
The Joint Review Committee on Education in Radiologic Technology (JRCERT) accredits Reading Hospital School of Health Sciences Medical Imaging Program. (JRCERT: 312-704-5300; www.jrcert.org)
